7. Dashboard Prototype for Cellular System Performance

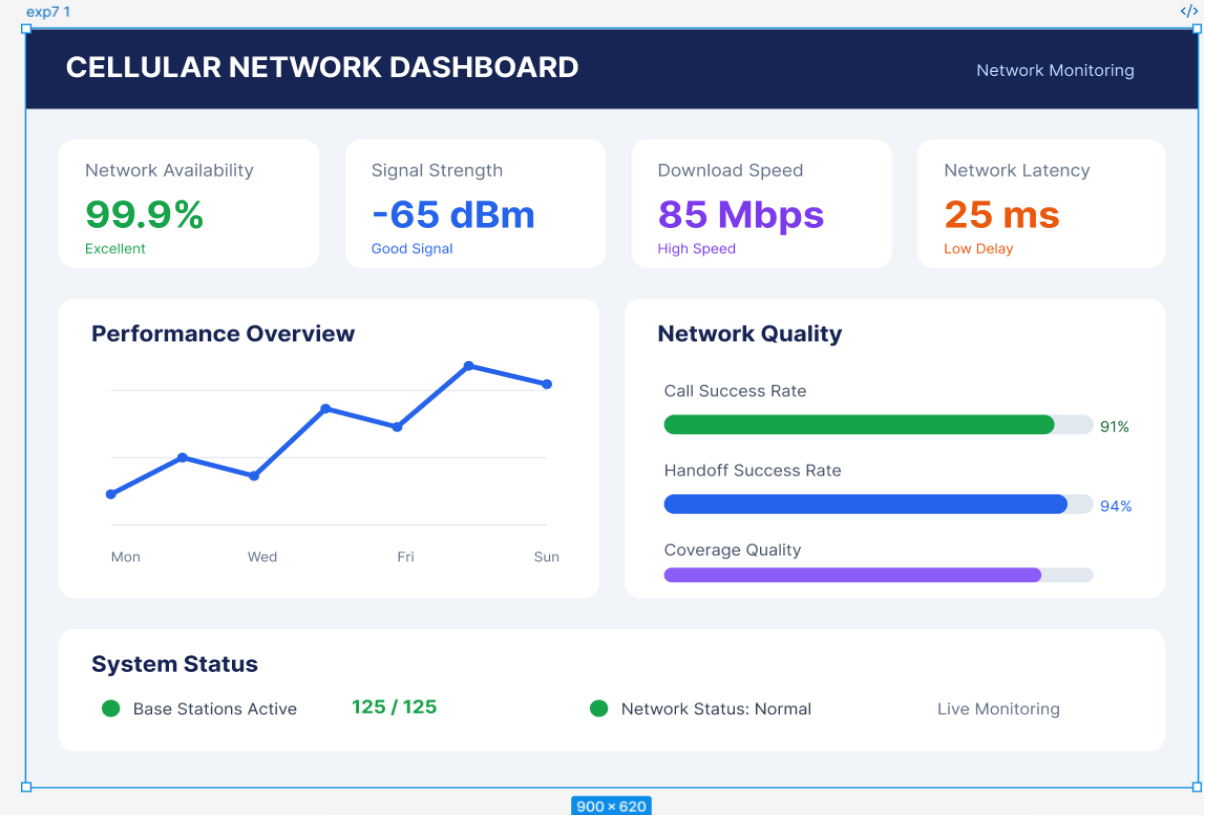

Aim: To develop a dashboard prototype in Figma displaying the performance criteria of a cellular communication system.

Procedure:

1. Open Figma and create a new design file.
2. Create a desktop frame for the dashboard.
3. Add a suitable dashboard title.
4. Include network throughput information.
5. Add signal strength and latency indicators.
6. Display call-drop rate and handoff statistics.
7. Add charts and graphs to represent network performance.
8. Arrange the dashboard elements using suitable colours and cards.
9. Preview the dashboard to check the layout.

Output:

Result: A cellular network performance dashboard prototype was successfully created using Figma.
