2. User Interface Prototype for a Mobile Station

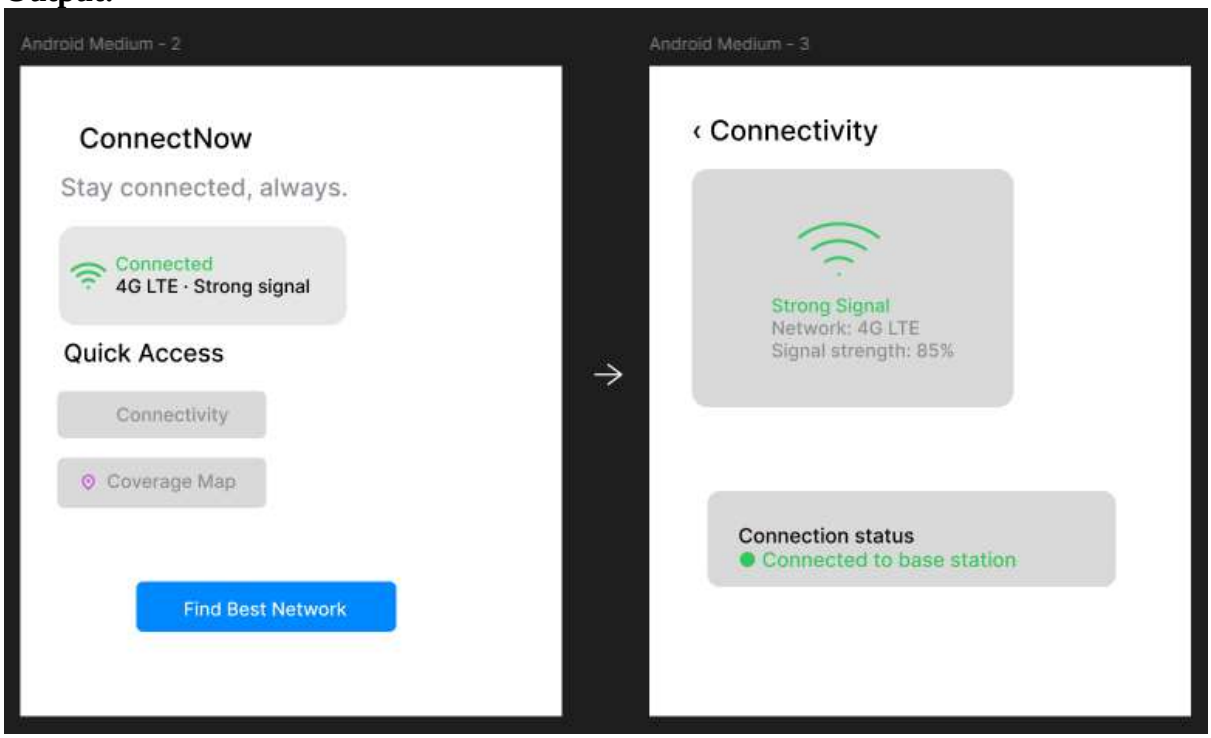

Aim:
To design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

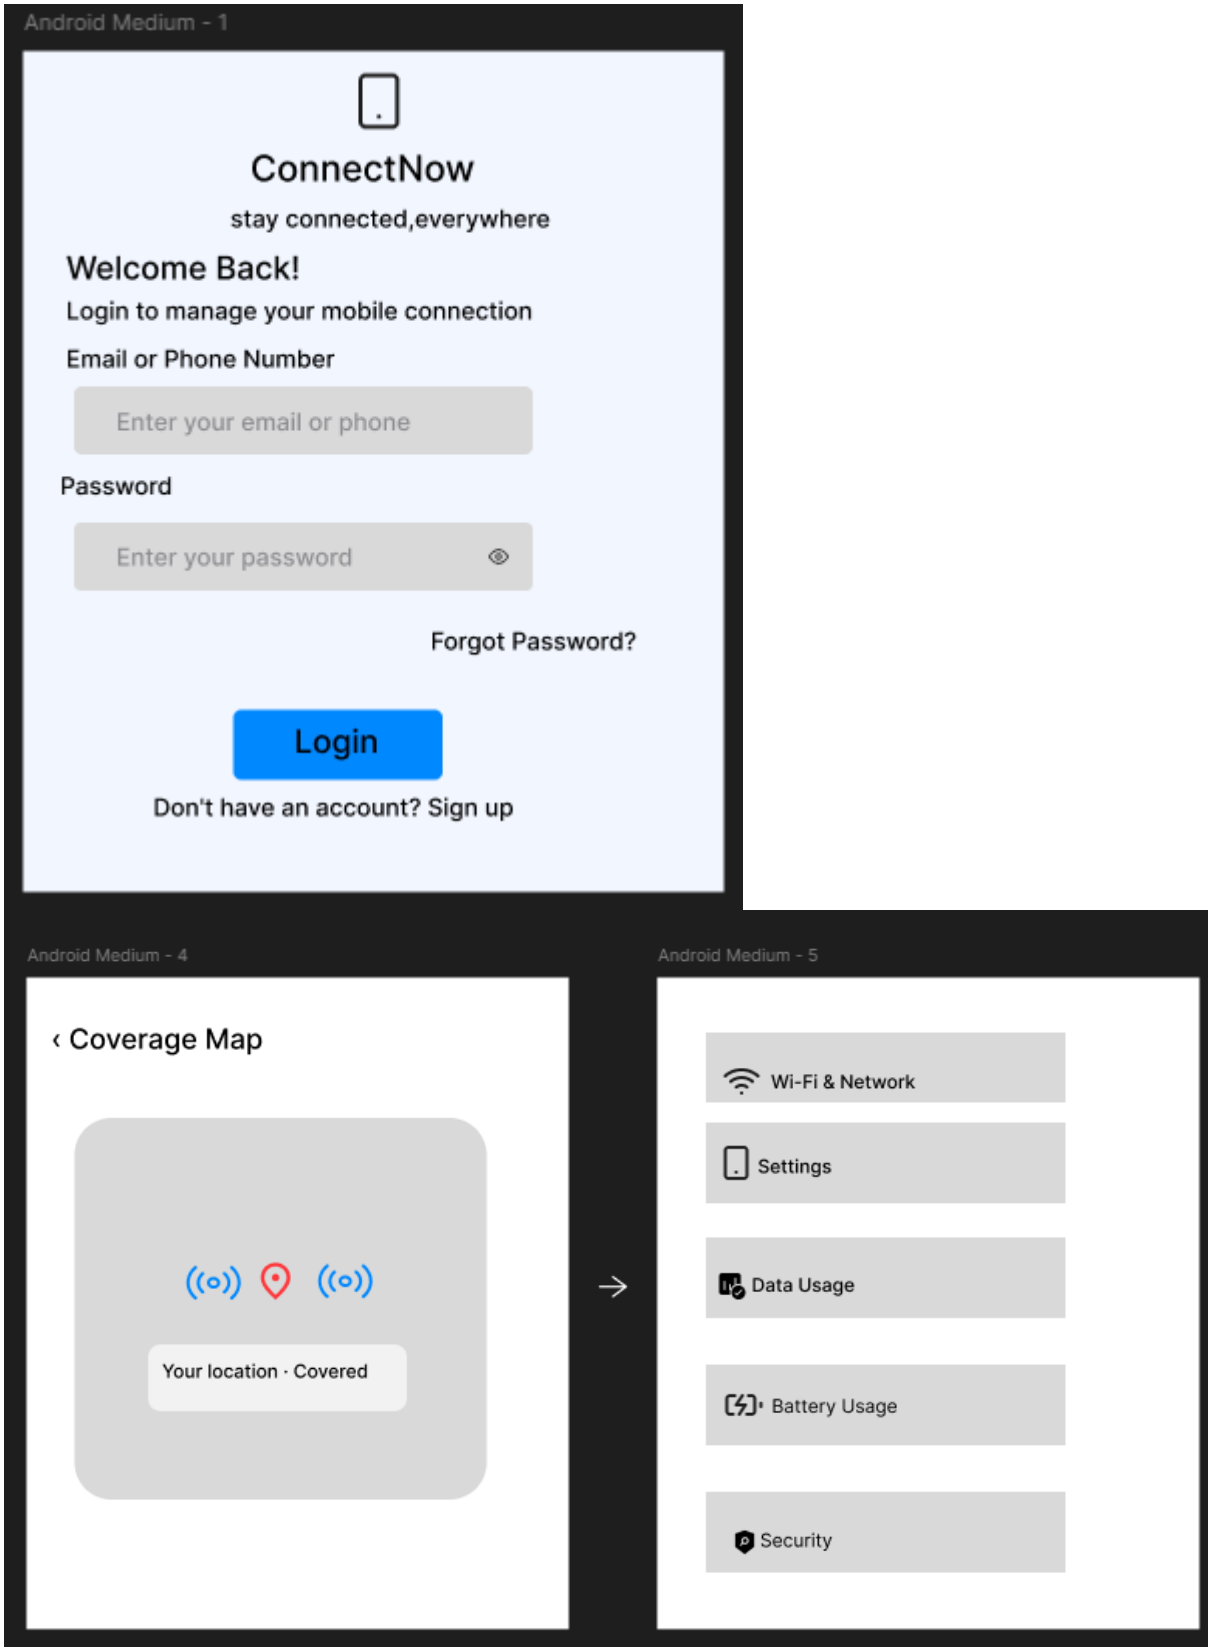

Procedure:

1. Open Figma and create a new design file.
2. Select a mobile phone frame.
3. Design a home screen with a simple layout.
4. Add network signal, battery and connectivity icons.
5. Add buttons for calls, messages and contacts.
6. Create a settings screen for network connectivity.
7. Use suitable colours, fonts and icons.
8. Connect the screens using prototype links.
9. Preview the prototype to check navigation.

Output:

Result:
A mobile station user interface prototype was successfully designed using Figma.
