12. Use Figma to Create an Interactive Diagram Illustrating the Evolution from 1G to 5G

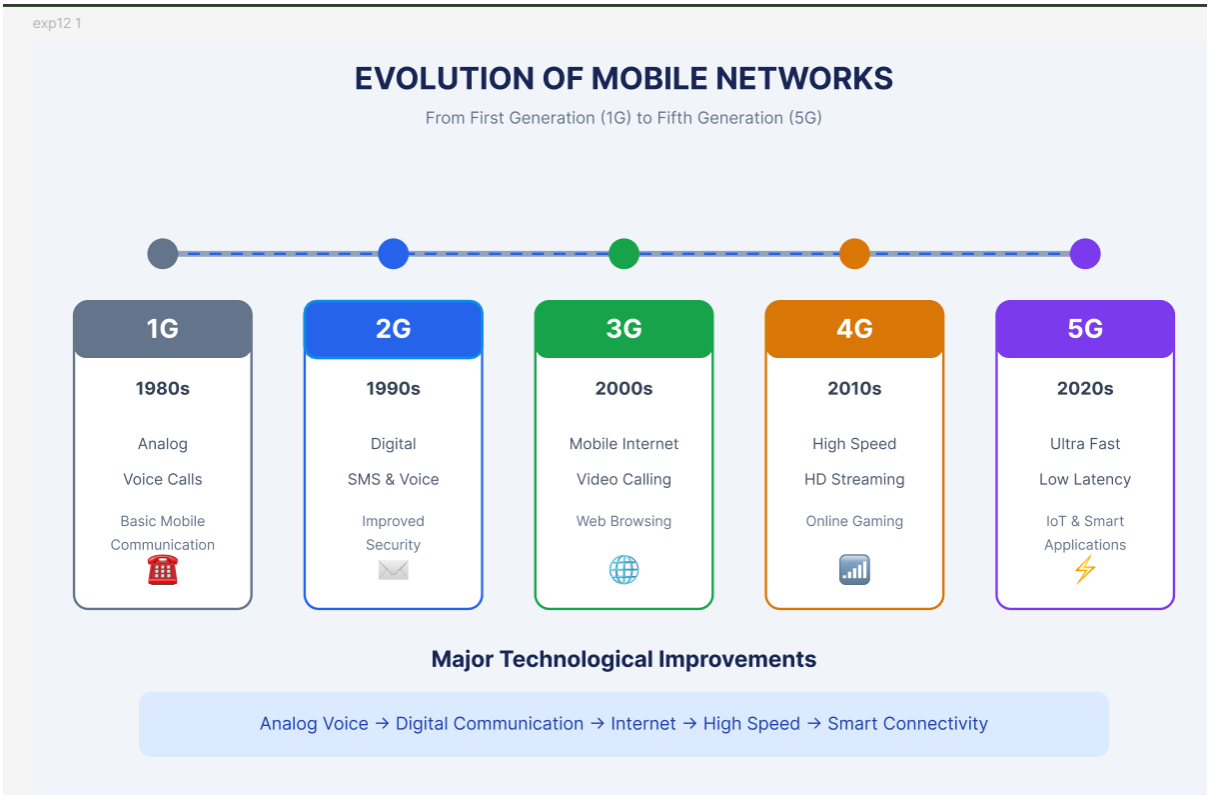

Aim:

To create an interactive diagram using Figma that illustrates the evolution of mobile communication technologies from 1G to 5G and highlights their features and advancements.

Procedure:

1. Open Figma and create a new design file.
2. Create a suitable frame for designing the evolution diagram.
3. Add five sections representing 1G, 2G, 3G, 4G, and 5G technologies.
4. Include the major features of 1G, such as analog signals and voice communication.
5. Add the features of 2G, including digital communication, SMS, and improved voice quality.
6. Illustrate 3G with mobile internet, video calling, and multimedia services.
7. Include 4G features such as high-speed internet, HD video streaming, and online gaming.
8. Add 5G features such as ultra-fast connectivity, low latency, IoT, and smart applications.
9. Use arrows, icons, colors, and Figma's Prototype feature to connect the generations and create interactive navigation.

Output:

Result:

Thus, an interactive diagram illustrating the evolution of mobile communication technologies from 1G to 5G was successfully created using Figma.
